

## Final Report: Drupal Environmental Information Management System (DEIMS) workshop: A workshop for new and advanced DEIMS users

The workshop was held November 6-8, 2012 at the LNO's training lab at the University of New Mexico. Shakib Mostafa from Isovera, a Drupal development company, who does Drupal trainings was hired to teach several sessions. Topics included 1) an introduction to Drupal 7, 2) how to import data in to Drupal using feeds, 3) how to create and use entities, a new way to represent information in Drupal 7, 4) CSS, themes, and templates in Drupal and how to manipulate them to customize the appearance of a web site, and 5) how to create a "feature", which is a way to package a Drupal site to share with someone else. The workshop was very professional and structured, and participants felt that they got what they needed from it.

### Participants:

Hap Garritt (PIE)  
Eda Melendez-Colom (LUQ)  
Ken Ramsey (JRN)  
Jim Laundre (ARC)  
Aaron Stephenson (NTL)  
Yang Xia (LNO)  
Leanne Yanabu (LNO)  
Marshall White (LNO)  
Inigo San Gil (MCM)  
Kristin Vanderbilt (SEV)
