

Gina Paduano Ralph has served the public for more than 20-years working with Martin County, Florida, U.S. Fish and Wildlife Service, U.S. Army Corps of Engineers, Jacksonville District, and the Engineering and Research Development Center. She has worked with the Corps since 2009 in various roles including Lead Scientist, Research Ecologist, Environmental Branch Chief, South Florida Section Chief, and Coastal Navigation Section Chief, incorporating sound science into decision making for Corps' Civil Works initiatives. She currently is the Chief of the Science Integration Branch and the Restoration, Coordination and Verification (RECOVER) Program Manager for the Comprehensive Everglades Restoration Plan. She holds a doctorate in ecology and conservation biology from Florida Institute of Technology, a master's degree in zoology from Connecticut College and a bachelor's degree in biology from Rollins College. Dr. Ralph is a graduate of the Florida Natural Resources Leadership Institute and is a skilled leader in conflict management, facilitation, and communication for those working in natural resource management.
